

Jeferson Daniel Mamián

Front End Developer

Cali, Colombia (GMT-5)

Contact information here:

<https://jedamario.dev/>

Front-end Developer with **6+ years** experience, working with different technologies such as: **React, Next, Redux, Zustand, TypeScript, Firebase, Claude, Cursor, Jest, RTL, Vitest, Enzyme, Recharts, Cypress, Node, AWS and Git**. In my career, I have worked using **Agile Methodology** like **Scrum, Automatic Testing** and **Code Reviewer** as a **front end** on projects for different companies. I made landings, games, web site's, web applications and e-commerce. I am looking for a job that allows me to grow as a professional and continue learning and applying more knowledge about different front-end frameworks, following the best practices of coding, design, and architecture.

EXPERIENCE:

DD3/Wiggot — February 2024 - current

- Re building an application [Wiggot](#), working in landing page, home, shop, search and my properties modules. Making it possible for brokers to upload their listings, generate PDF documents about those properties, import them from other sites, create customized listings, buy different plans with discounts, organize their portfolio, make appraisals of their properties, access statistical data of their properties or listings and share these reports.

Tech Stack: NextJs, Tailwind, Redux, Zustand, TypeScript, Recharts and Mapbox.

- Development of a responsive application for lead management, using eleven labs to answer calls and whatsapps, kanban dashboards and a table to visualise leads. This feature

Tech Stack: NextJs, Tailwind, Redux, Zustand, TypeScript and Elevenlabs.

Dacodes /DD3 — February 2023 - September 2024

- Create an application [Monopolio listings](#). Making it possible to upload and search listings for Mexico, generate PDF documents about those properties, import them from other sites, organize their portfolio, make appraisals of their properties, access statistical data of their properties or listings and share these reports.

Tech Stack: NextJs, Tailwind, Redux, Zustand, TypeScript, Storybooks and Mapbox.

Design system — August 2023 - current

- Building a [Design system](#) for the company to reuse components in all the company's applications, thus avoiding redundancy in the code, improving programming performance and reducing the number of bugs with unit tests.

Tech Stack: NextJs, Tailwind, Vite, Storybook and Chromatic.

Listings B2C — March 2023 - July 2023

- Building an application [\(Monopolio Listings\)](#) with the best levels of SEO, accessibility, performance and best practices.

Tech Stack: NextJs, Tailwind, Redux, Zustand, Typescript and Mapbox.

Freelance— November 2022 - Current. These are some of the freelance projects that are published

Wordle Game— January 2023

- Building a game responsive [\(Wordle Game\)](#) with the best performance, accessibility and practices.

Tech Stack: React, Redux, TailwindCss, Typescript, Vitest, React-testing-library. Repository [\(Wordle-Rep\)](#)

Veevart— February 2022 - February 2023. The projects I developed for this company are private. contact me for more information

Veevart Website — October 2022 - November 2022

- Building a website responsive [\(Veevart\)](#) with the best levels of SEO, accessibility, performance and best practices.
- Implementing with nextjs tools such as Image, Sitemap, Next-seo and memorization techniques.

Tech Stack: NextJs, Redux, Typescript, Sass, and MongoDB.

Ticketing App — July 2022 - September 2022

- Improve the scalability, maintainability, and reliability of the application in the back-end structure by changing the services from javascript to typescript, and refactoring them by applying *SOLID* principles.
- Reduce the technical overhead and the number of errors and bugs by improving the front-end structure by refactoring the CSS using the BEM methodology, the components using memoization, and component *design patterns*.
- Refactoring and maintenance Ticketing App [\(Ticketing\)](#)

Tech Stack: React, Redux, TypeScript, Less, Jest, React-testing-library, NodeJs, Express, Salesforce, and Apex.

Private Room 2.0 — June 2022

- Improved the app's user experience by redesigning the entire front-end and adding new features that allow customizing the view to the user's liking from salesforce.
- Adding new features that allow customizing the view. Redesign and refactoring to Private Room [\(Private Room\)](#).

Tech Stack: Nextjs, Context API, TypeScript, Sass, NodeJs, Express, Salesforce and Apex.

Socio Digital—February 2021 - Enero 2022. The projects I developed for this company are private. Contact me for more information

CESOF (Centro Social de Oficiales)— November 2021 - December 2021

- Building a website [\(CESOF\)](#) with the best levels of SEO, accessibility and best practices.

Tech Stack: NextJs, Context API, TailwindCs, Graphql and Firebase.

El Socio Digital— September 2021 - October 2021

- Building a website responsive [\(El socio digital\)](#) with the best levels of SEO, accessibility and best practices. Adding animations and effects with Gsap

Tech Stack: Nextjs, Context API, TailwindCss, Gsap, Sass, Graphql and Firebase.
